Programming, Data Structures and Algorithms using Python - Nptel (October 2025 to Present)

Present

Python for data science - Nptel (October 2024 to Present)

Present

Additional Information

Project: SustainHire

Team Project | October 2025

 <https://sustainhireenterprise.netlify.app/>

- Developed a full-stack web application to help students find internships in sustainability-related fields.
- Collaborated with a team to design a responsive frontend using HTML, CSS, Bootstrap, and JavaScript.
- Implemented backend using Node.js and Express.js, connected to MongoDB Compass for secure data storage.
- Deployed via Netlify (frontend) and Render (backend) to ensure smooth accessibility and scalability.
- Created an interactive and user-friendly platform promoting green careers and environmental awareness.
